

Polesie Lubelszczyzna 1:5

Polesie i Lubelszczyzna 1:5 – text file in English

This is version of map for ETS2 1.46

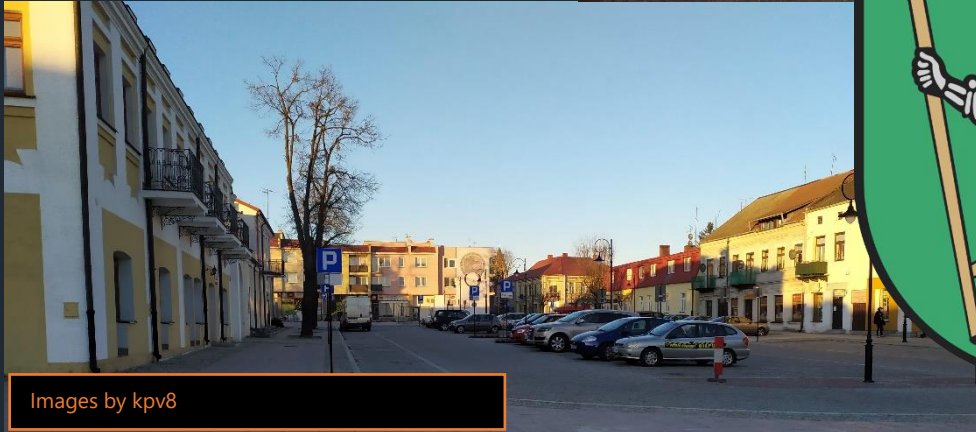

Polesie i Lubelszczyzna is a map that contains beautiful area of eastern Poland. Polesie is a historical land of Polish – Lithuanian Commonwealth, there are many forests untouched by human activity around here. After World War II most of Polesie became part of USSR and Belarus, but west part is now in Poland near its east border. Most of that area is now Poleski National Park, to keep its natural values.

Images taken from: <http://www.poleskipn.pl/>

The capital of Polesie is **Włodawa**. In this very lovely city were living three cultures: Poles, Jews and Belarussians.

There are many historical buildings like old city with „czworobok”, churches and synagogue.
