

Polesie Lubelszczyzna 1:5

Polesie i Lubelszczyzna 1:5 – text file in English

This is version of map for ETS2 1.48

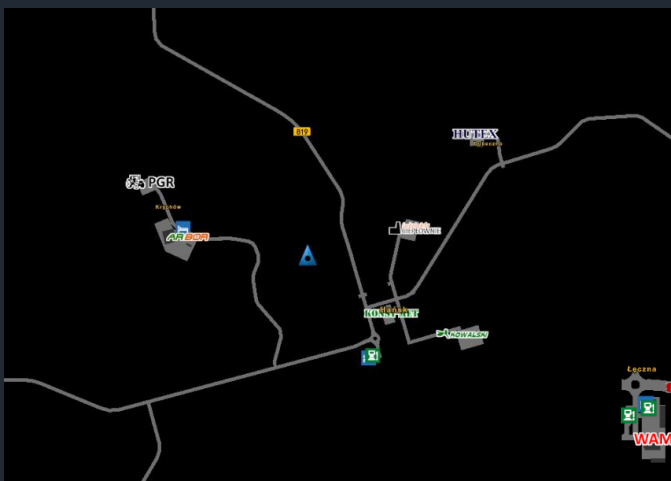

Polesie i Lubelszczyzna is a map that contains beautiful areas of eastern Poland. Polesie is a historical land of Polish – Lithuanian Commonwealth. West part of Polesie is now part of Poland. Most of that area is now Poleski National Park, to keep its natural values.

Comparing to Polesie, Lubelszczyzna is so varied land (there are highlands there too). It's the surrounding areas of Lublin city.
