REQUIREMENTS

- **Alexander Blade's ScriptHookRDR2**

Content

INSTALLATION INSTRUCTIONS

- Install all the **required dependencies**

- Extract **"Red Dead Radio.asi"** in to the root of your game's installation folder

- Extract **"Red Dead Radio" folder** in to the root of your game's installation folder

- Done!

HOW TO USE

Add **.mp3** or **.wav** files in to either of the folders found in the **"Red Dead Radio" folder** (currently there is a bug if music isn't found in a folder. The bug causes the radio wheel to flash. I suggest filling out all 3 radio folders)

If you want to rename your music folder make sure to also rename the path in **"Red_Dead_Radio.ini"** file found in **"Red Dead Radio" folder**.

When in-game, you can access Red Dead Radio by riding your horse, a wagon or driving a train.

Mouse & Keyboard: Press **"Q" + "R"** to open the radio wheel and then click to select an option.
Controller: Hold RB/R1 + X/Square, then use the left analog stick to move the cursor and press it down to click on the GUI.

Media Player Mode:

If you want to listen to music while being on foot you can enable the **"Media player mode"**. To do this, open **"Red_Dead_Radio.ini" file** and set **media_player_mode = true**.

DESCRIPTION

Red Dead Radio is a mod which adds a functional radio wheel when the player is riding a horse, driving a wagon or is on a train. This will make it easy listening to music while riding across the map and kill boredom.
