

Thank you for downloading my mod!

Mod is compatible with 1.52 version of the game.

So far only MCI coaches from the pack were made drivable.

All busses can be purchased from Kenworth dealership. Switch between liveries by selecting different chassis.

Interiors are not animated. Mod uses interiors of the AI vehicles.

Camera adjustment limits were set to higher values in case the interior camera hangs somewhere outside a vehicle.

Instalation instructions:

1. Extract files from the archive. Put .scs archive in your mod folder.
2. Download "Bus Traffic Pack by Jazzycat". Can be found at <https://www.modland.net/american-truck-simulator-mods/other/bus-traffic-pack-by-jazzycat.html>
3. Make sure you have installed Sk3lecreeper's "Driveable AI". As well as Jazzycat's pack this mod is **absolutely necessary**, my mod is **not standalone**, it won't work without it. You can find it on steam: <https://steamcommunity.com/sharedfiles/filedetails/?id=2894380342>
4. Activate all mods it in the Mod Manager. "Drivable Jazzycat's bus pack" should be activated with the higher priority than Sk3lecreeper's "Driveable AI" and "Bus Traffic Pack by Jazzycat".

If you like my mod and want to know about updates, report issues or make suggestions, please feel free to join my group on Steam:
