

5-STEPS GUIDE TO ENJOY GRAND UTOPIA OF AMERICA TO THE FULL

1

Make sure you have the required DLC.

Currently, to play Grand Utopia of America, you need the following DLC: Nevada and Arizona. These are free of charge.

2

Create a new game and activate the mod.

GUOA is a standalone map. You need to create a new game to play it. During the creation process, activate the mod and select the right map module.

3

If needed, increase the memory allocated to ATS.

If your game crashes with GUOA, try increasing your buffer size. I recommend increasing it from 10 (default) to 30.

4

Dive into the world of GUOA with its Wiki.

A carefully crafted atmosphere has been created to offer you a realistic and immersive game. Discover the history of GUOA via the “Utopian Markers” in-game or on the wiki.

5

Actively support the creation of our utopias.

If utopia appeals to you, consider joining my Patreon to help me continue creating our magnificent American and European utopias!
