

Addon

*FAKE CURTAINS FOR
SCANIA NEXT GEN, ETS2.*

VERSION 1.1

oq37

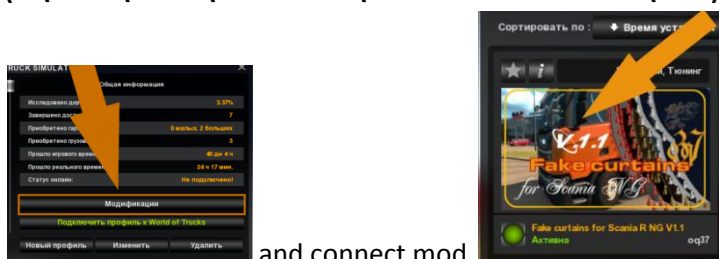

1. Description.

Good afternoon, dear community simulator ETS2. My name is Davydov Oleg, or oq37, whatever you like.

I bring to your attention the new version (1.1) of my mod, **Fake_curtain_oq37_ScaniaNG**, which I hope you tried earlier. In this version I added a variant of Mighty Griffin side curtains. This version of the curtain somewhat closes the view and completely covers the side mirror. Because in this version I added the ability to adjust the location of the side mirror.

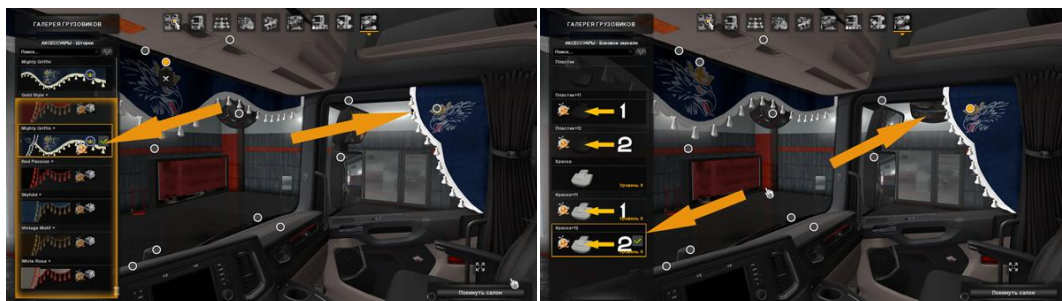

2. Installation.

Archive **Fake_curtain_oq37_ScaniaNGv1.1** put it in the folder with your mod
(C:\Users\Name\Documents\Euro Truck Simulator 2\mod) start the game. Go to manage mod

and connect mod.

Further all is simple - on the service, or the shop will buy the curtains that you like. Curtains from the supplement are indicated by an additional symbol "+" in the title and changed the picture.

If you want to fully use the side mirror, adjust its location, as you like.

Select, install and go. Have a good trip!

Sincerely, Oleg Davydov (oq37).
