5. Now search the text file **manifest.sii** and open the file with WordPad
6. Once opened the file go to where it says **compatible\_versions[]: "1.34.\*"**

```
SiiNunit
{
# ".package_name" does not matter as the dot at the beginning of the file means
that this unit is anonymous.
# Please keep this form to not make any conflicts with other mod packages (name
collisions).
mod_package : .package_name {

    # Package version can be any string with any length.
    package_version: "V1.2.2"

    # Display name can be any string with any length.
    display_name: "SISU R500, C500 and C600"

    # Author can be any string with any length.
    author: "RJL"

    # Categories is an array of strings.
    category[]: "truck"

    # Icon inside the root directory of the mod.
    icon: "rjl_sisu_r500.jpg"

    # Description file inside the root directory of the mod.
    description_file: "rjl_sisu_r500_description.txt"

    compatible_versions[]: "1.31.*"
    compatible_versions[]: "1.32.*"
    compatible_versions[]: "1.33.*"
    compatible_versions[]: "1.34.*"

}
}
```

7. Just under write the following: **compatible\_versions[]: "1.35.\*"**

```
SiiNunit
{
# ".package_name" does not matter as the dot at the beginning of the file means
that this unit is anonymous.
# Please keep this form to not make any conflicts with other mod packages (name
collisions).
mod_package : .package_name {

    # Package version can be any string with any length.
    package_version: "V1.2.2"

    # Display name can be any string with any length.
    display_name: "SISU R500, C500 and C600"

    # Author can be any string with any length.
    author: "RJL"

    # Categories is an array of strings.
    category[]: "truck"

    # Icon inside the root directory of the mod.
    icon: "rjl_sisu_r500.jpg"

    # Description file inside the root directory of the mod.
    description_file: "rjl_sisu_r500_description.txt"

    compatible_versions[]: "1.31.*"
    compatible_versions[]: "1.32.*"
    compatible_versions[]: "1.33.*"
    compatible_versions[]: "1.34.*"
    compatible_versions[]: "1.35.*"

}
}
```

8. To finish, save and update the file
